

Recognition for

Submitted by- Stephanie Mai
Bridgetower Crossing- Meridian Idaho

Who is your Builder?

Steel Creek Construction

When was your home Completed?

April 2009

Construction Type?

Semi- Custom

Builder Recommendation

Our home was 95% complete when we found it on MLS listing. The quality of the home is exceptional and there are many upgrades and features in this home that we could not find with other homes in the same price range. Our builder has a wonderful sense of what works and doesn't work in a comfortable family home.

Why should your builder be recognized for Construction Excellence

Steel Creek Construction should be recognized because the owners, Jim and Angie, are wonderful, honest, and professional. They listen to every concern we have and are always willing to come back and fix any problem we encounter. We feel as if they were our friends instead of just a random builder and trusted them with every decision they made.

Is your home Energy Star, NAHB Green or LEED Certified?

No.

What is the best feature or element of your home?

Exceptional quality of craftsmanship. There are details that you don't find in many of the "cookie cutter" homes in my neighborhood. The floor plan is great for our family and different than the "model" homes in the subdivision.

Tell us about your community.

Bridgetower Subdivision. We chose this area because of close proximity to the schools, good family-oriented neighborhood, pool and common areas

And your Realtor?

Curtis Mai, Homeland Realty. Curt goes above and beyond his duties as a realtor. He makes no judgements and simply tries to find the best fit for his clients. We were so grateful to have him representing us!

What advice would you give someone buying or building a new home?

Find a great realtor and do your research before you buy!
