Who is your Builder?

Tradewinds Building Company

When was your home Completed?

March 2008

Construction Type?

Remodel

Builder Recommendation

Tradewinds originally built our home. We wanted to extend a request for bid to them because the original construction was high quality and they have always been responsive to our needs. Since our home had a west-facing back yard and no mature trees, the sun in summer was absolutely horrific. We decided to build a deck cover that looked like an extension of the house to block the sun and heat. Tradewinds provided a competitive quote and were willing to listen to our design ideas and develop a solid plan. The workers were professional and FAST. The project ended on time and on budget. As a result of the construction the aesthetics of the home has improved tremendously (even Tradewinds was amazed at the transformation), our energy bills have substantially reduced, and we have a gorgeous entertainment space now.

Why should your builder be recognized for Construction Excellence

Great value, excellent quality, high degree of professionalism, creative problem solving, and the project ended on time and on budget.

What is the best feature or element of your home?

Pertaining to this construction - the whole deck cover is wonderful, but the best part is we can now have the blinds OPEN and the heat doesn't get into the house. The natural light is wonderful inside the house now.

What advice would you give someone buying or building a new home?

N/A
